Who We Are

As the unavailability and price of both labour and building materials is going to be a great problem in the future, this is the good time for introducing new construction materials and practices which can reduce construction time, cost, and effort. Which will give an ease for the whole construction sector.

Super structure construction is the most time consuming and major cost consuming step on a residential and industrial construction activity.

In Kerala majority of super structure constructions are done using clay bricks, cement solid bricks, laterite stones etc.

In this the availability of clay and laterite is reducing day by day. The construction practice of all the above mentioned materials are some what similar.

Why Choose Us

We help you to reduce cost, manpower, time and effort. We assure Quality. We Main benefits of Goe's Concrete Interlocking Brick are

Assured Quality

Our Interlocking bricks are strong and durable, They also require less maintenance than standard bricks. And we assure quality of bricks.

Value for Money

Interlock bricks are made with sand and soil in addition to cement, they come with lower cost than regular bricks. It can cost as much as less than 35% of regular bricks.

Sustainable

Using interlocking brick can help preserve the environment. Because it uses less concrete and mortar. But residents of building do not need to use air conditioning.

AAC Blocks

AAC is made with fine aggregates, cement, and an expansion agent that causes the fresh mixture to rise like bread dough. In fact, this type of concrete contains 80 percent air. It helps to reduce heat.

Steel Windows

Steel is a strong metal that can be used to give window frames a high level of security as well as a sleek modern design. As a strong material, steel windows won't need to be replaced for many years to come.

[View Details](#)

Steel Doors

Other than the weight factor, steel and most metals are remarkably good conductors of heat and cold. Thermal conduction is not a desired quality for a door. The polyurethane or polystyrene core acts as a thermal barrier.
